MINISTRY OF EDUCATION AND SCIENCE OF UKRAINE NATIONAL TECHNICAL UNIVERSITY OF UKRAINE "Igor Sikorsky Kyiv Polytechnic Institute"

APPROVE

Academic Council of Igor Sikorsky Kyiv Polytechnic Institute (Meeting protocol No. 3 from March 15, 2021)

Head of Academic Council Mykhailo ILCHENKO

Engineering of Intelligent Electrotechnical and Mechatronic Complexes

EDUCATIONAL PROFESSIONAL PROGRAM

second (master's) level of higher education

specialty	141 Electric Power Engineering, Electrotechnics and Electromechanics
field of knowledge	14 Electrical Engineering
qualification	Master of Electric Power Engineering, Electrotechnics and Electromechanics

Put into effect by the Rector's Order Igor Sikorsky Kyiv Polytechnic Institute from April 19, 2021 No. HOH/89/2021

PREAMBLE

DEVELOPED by a working group:

Chairman of the working group

Shevchuk Stepan Prokopovich, Doctor of Technical Sciences, Professor of the Department Automation of Electrical and Mechatronic Complexes

Members of the working group:

Mayta Oleksandr, Candidate of Engineering Sciences (Ph.D.), Associate Professor at the Department of Automation of Electrical and Mechatronic Complexes Danilin Alexander, Candidate of Engineering Sciences (Ph.D.), Associate Professor at the Department of Automation of Electrical and Mechatronic Complexes Bosak Alla, Candidate of Engineering Sciences (Ph.D.), Associate Professor at the Department of Automation of Electrical and Mechatronic Complexes Polishchuk Valentina, Senior Lecturer at the Department of Automation of Electrical and Mechatronic Complexes Novikov Anton Alexandrovich, student at the Department of Automation of Electrical and Mechatronic Complexes

Head of the Department of Automation of Electrical and Mechatronic Complexes Rozen Viktor, Doctor of Technical Sciences, Professor

AGREED:

Scientific and methodical commission of Igor Sikorsky Kyiv Polytechnic Institute on specialty 141 Electric Power Engineering, Electrotechnics and Electromechanics

Head of Scientific and Methodological commission on specialty 141 Oleksandr YANDULSKYI (Meeting protocol No. 4 of February 18, 2021)

Methodical council of Igor Sikorsky Kyiv Polytechnic Institute

Chairman of the Methodological Council Yurii YAKYMENKO (Meeting protocol № 6 from February 25, 2021)

Educational and professional program "Engineering of intelligent electrical and mechatronic complexes" of the second (master's) level of higher education has passed external testing and received feedback and reviews from stakeholders: LLC "Axion Energy Global Ukraine", LLC "NTK ENPASELECTRO", Enercis Ukraine LLC.

The Program takes into account the proposals of stakeholders and professional associations.

CONTENTS

1. DESCRIPTION OF THE EDUCATIONAL PROGRAM	4
2. LIST COMPONENTS OF THE EDUCATIONAL PROGRAM	10
3. STRUCTURAL-AND-LOGICAL SCHEME OF THE EDUCATIONAL PROGRAM	11
4. THE FORM OF GRADUATION CERTIFICATION FOR THE RECIPIENTS OF HIGHER EDUCATION	12
5. MATRIX OF CORRESPONDENCE OF PROGRAM COMPETENCES TO EDUCATIONAL PROGRAM COMPONENTS	13
6. MATRIX OF PROVIDING PROGRAM LEARNING OUTCOMES WITH RELEVANT COMPONENTS OF THE EDUCATIONAL PROGRAM	14

1. DESCRIPTION OF THE EDUCATIONAL PROGRAM

	1 – General information
Eall as a set the Ulation	
Full name of the Higher	National Technical University of Ukraine "Kyiv Polytechnic
Education Institution and	Institute named after Igor Sikorsky", Institute of Energy
Institute /Faculty	Conservation and Energy Management
Higher education degree and	Degree – Master
title of qualification in the	Qualification - Master of Electric Power Engineering,
original language	Electrotechnics and Electromechanics
The official name of the educational program	Engineering of intelligent electrical and mechatronic complexes
Type of diploma and scope of educational program	Master's degree, single, 90 credits, term of study 1 year, 4 months
Availability of accreditation	Accredited for the first time
Level of National	NQF of Ukraine - level 7
Qualifications Framework	QF-EHEA – the second cycle
	EQF-LLL – Level 7
Prerequisites	Having a bachelor's degree
Language (s) of teaching	Ukrainian / English
The duration of the Educational Program	Accredited for the first time
Internet address of the	https://osvita.kpi.ua/ section "Educational programs"
permanent placement of the	<u>intps.//osvita.kpi.ua/</u> section Educational programs
educational program	
	– The purpose of the educational program
	able of solving complex problems and problems in the power,
	cal industries and to carry out innovative professional activities by the conditions of labor market transformation through interaction
	keholders. The purpose of the educational program corresponds to
	PI. Igor Sikorsky for 2020-2025 on the formation of the society of
	oncept of sustainable development.
	Characteristics of the educational program
Subject area	Objects of study and activity:
Subject area	
	I - Electrical and electromechanical services of enterprises i
	- electrical and electromechanical services of enterprises, scientific and design institutions:
	scientific and design institutions;
	scientific and design institutions; - enterprises of the electric power industry, including the fuel
	scientific and design institutions;enterprises of the electric power industry, including the fuel and energy complex;
	 scientific and design institutions; enterprises of the electric power industry, including the fuel and energy complex; production, transmission, distribution and conversion of
	 scientific and design institutions; enterprises of the electric power industry, including the fuel and energy complex; production, transmission, distribution and conversion of electric energy at power plants, electric networks and systems
	 scientific and design institutions; enterprises of the electric power industry, including the fuel and energy complex; production, transmission, distribution and conversion of electric energy at power plants, electric networks and systems and their engineering;
	 scientific and design institutions; enterprises of the electric power industry, including the fuel and energy complex; production, transmission, distribution and conversion of electric energy at power plants, electric networks and systems and their engineering; electrotechnical equipment, electromechanical and switching
	 scientific and design institutions; enterprises of the electric power industry, including the fuel and energy complex; production, transmission, distribution and conversion of electric energy at power plants, electric networks and systems and their engineering;
	 scientific and design institutions; enterprises of the electric power industry, including the fuel and energy complex; production, transmission, distribution and conversion of electric energy at power plants, electric networks and systems and their engineering; electrotechnical equipment, electromechanical and switching equipment, electrotechnical, electrotechnical complexes, and
	 scientific and design institutions; enterprises of the electric power industry, including the fuel and energy complex; production, transmission, distribution and conversion of electric energy at power plants, electric networks and systems and their engineering; electrotechnical equipment, electromechanical and switching equipment, electromechanical, electrotechnical complexes, and intelligent control systems.
	 scientific and design institutions; enterprises of the electric power industry, including the fuel and energy complex; production, transmission, distribution and conversion of electric energy at power plants, electric networks and systems and their engineering; electrotechnical equipment, electromechanical and switching equipment, electromechanical, electrotechnical complexes, and intelligent control systems. The purpose of training: training of specialists capable of
	 scientific and design institutions; enterprises of the electric power industry, including the fuel and energy complex; production, transmission, distribution and conversion of electric energy at power plants, electric networks and systems and their engineering; electrotechnical equipment, electromechanical and switching equipment, electromechanical, electrotechnical complexes, and intelligent control systems. <i>The purpose of training</i>: training of specialists capable of designing, designing, operating, providing a safety culture,
	 scientific and design institutions; enterprises of the electric power industry, including the fuel and energy complex; production, transmission, distribution and conversion of electric energy at power plants, electric networks and systems and their engineering; electrotechnical equipment, electromechanical and switching equipment, electromechanical, electrotechnical complexes, and intelligent control systems. <i>The purpose of training</i>: training of specialists capable of designing, designing, operating, providing a safety culture, performing installation, commissioning and repair, creating new
	 scientific and design institutions; enterprises of the electric power industry, including the fuel and energy complex; production, transmission, distribution and conversion of electric energy at power plants, electric networks and systems and their engineering; electrotechnical equipment, electromechanical and switching equipment, electromechanical, electrotechnical complexes, and intelligent control systems. <i>The purpose of training</i>: training of specialists capable of designing, designing, operating, providing a safety culture, performing installation, commissioning and repair, creating new equipment and implementing the latest technologies, conducting

	mechanics, modeling, optimization and analysis of modes of operation of power plants, networks and systems, electric machines, electric drives, electrotechnical and mechatronic systems and complexes. <i>Methods, techniques and technologies:</i> analytical methods for calculating electrical circuits, power supply systems, electrical machines and devices, intelligent control systems for electrical, electromechanical and mechatronic systems, electrical loads using specialized laboratory equipment, personal computers, microprocessors and programmable logic systems. <i>Tools and equipment:</i> control and measuring devices, electrical and electronic devices, microcontrollers, computers.
Orientation of the	Educational and professional
educational program	
The main focus of the	The program is based on well-known scientific principles, taking
educational program	into account the current state of development of energy,
	electrical engineering, electromechanics and mechatronics
	focuses on current specializations, within which further professional and scientific activities are possible.
	Keywords: electrotechnical, electromechanical and mechatronic
	systems and complexes, devices and equipment, control systems,
	intelligent automation systems, engineering.
Peculiarities of the program	It is possible to use a mixed form of education.
· · ·	y of graduates for employment and further education
Eligibility for employment	According to the classifier of professions <u>ДK003</u> : 2010.
	Professional certification is possible
Further training	Continuation of education at the third (educational and
	scientific) level of higher education and / or acquisition of
	additional qualifications in the system of adult education.
	5 – Teaching and evaluation
Teaching and studying	- involvement of specialists from other educational institutions in
	teaching disciplines;
	- conducting internships for students in the industry;
	 conducting internships for students in the industry; participation of higher education applicants in student research
	 - conducting internships for students in the industry; - participation of higher education applicants in student research circles;
	 conducting internships for students in the industry; participation of higher education applicants in student research circles; possibility to teach separate courses in English.
Assessment	 - conducting internships for students in the industry; - participation of higher education applicants in student research circles; - possibility to teach separate courses in English. Current and semester control in the form of laboratory reports,
Assessment	 conducting internships for students in the industry; participation of higher education applicants in student research circles; possibility to teach separate courses in English. Current and semester control in the form of laboratory reports, presentations, essays, written and oral examinations and defense

Integral competence	 conducting internships for students in the industry; participation of higher education applicants in student research circles; possibility to teach separate courses in English. Current and semester control in the form of laboratory reports, presentations, essays, written and oral examinations and defense of qualification work are evaluated in accordance with the defined criteria of the Rating system 6 – Program competencies Ability to solve complex problems and problems during professional activities in the field of power engineering, electrical engineering, electromechanics and mechatronics or in the learning process involving research and / or innovation.
Integral competence	 conducting internships for students in the industry; participation of higher education applicants in student research circles; possibility to teach separate courses in English. Current and semester control in the form of laboratory reports, presentations, essays, written and oral examinations and defense of qualification work are evaluated in accordance with the defined criteria of the Rating system 6 – Program competencies Ability to solve complex problems and problems during professional activities in the field of power engineering, electrical engineering, electromechanics and mechatronics or in the learning process involving research and / or innovation. GC1 Ability to search, process and analyze information from various sources.
Integral competence	 conducting internships for students in the industry; participation of higher education applicants in student research circles; possibility to teach separate courses in English. Current and semester control in the form of laboratory reports, presentations, essays, written and oral examinations and defense of qualification work are evaluated in accordance with the defined criteria of the Rating system 6 – Program competencies Ability to solve complex problems and problems during professional activities in the field of power engineering, electrical engineering, electromechanics and mechatronics or in the learning process involving research and / or innovation. GC1 Ability to search, process and analyze information from

	GC4	Ability to apply knowledge in practical situations.
	GC4 GC5	Ability to use a foreign language to carry out scientific
	005	and technical activities.
	GC6	
		Ability to make informed decisions.
	GC7	Ability to learn and master modern knowledge.
	GC8	Ability to identify and assess risks.
	GC9	Ability to work independently and in a team.
	GC10	Ability to identify feedback and adjust your actions
		based on them.
	PC1	Ability to apply the acquired theoretical knowledge,
		scientific and technical methods to solve scientific and
		technical problems and problems of power engineering,
		electrical engineering and electromechanics.
	PC2	Ability to apply existing and develop new methods,
		techniques, technologies and procedures to solve
		engineering problems of power engineering, electrical
		engineering and electromechanics.
	PC3	Ability to plan, organize and conduct research in the
		field of power engineering, electrical engineering and
		electromechanics.
	PC4	Ability to develop and implement measures to improve
		the reliability, efficiency and safety in the design and
		operation of equipment and facilities of electricity,
-		electrical engineering and electromechanics.
	PC5	Ability to analyze technical and economic indicators
		and examination of design decisions in the field of
		power engineering, electrical engineering and
		electromechanics.
Professional competencies	PC6	Ability to demonstrate knowledge and understanding of
(PC)		mathematical principles and methods required for use in
(10)		power engineering, electrical engineering and
		electromechanics.
	PC7	Ability to demonstrate awareness of intellectual
		property and contracts in power engineering, electrical
		engineering and electromechanics.
	PC8	Ability to research and identify problems and identify
		constraints, including those related to nature protection,
		sustainable development, health and safety and risk
		assessments in electricity, electrical engineering and
		electromechanics.
	PC9	Ability to understand and take into account social,
		environmental, ethical, economic and commercial
		considerations that affect the implementation of
		technical solutions in power engineering, electrical
	Data	engineering and electromechanics.
	PC10	Ability to manage projects and evaluate their results.
	PC11	Ability to evaluate indicators of reliability and
		efficiency of operation of electric power,
		electrotechnical and electromechanical objects and
		systems.

PC12 Ability to develop plans and projects to ensure the achievement of a specific goal, taking into account all aspects of the problem, including the production, operation, maintenance and disposal of equipment for power, electrical and electromechanical systems. PC13 Ability to demonstrate awareness and ability to use regulations, norms, rules and standards in power engineering, electrical engineering and electromechanics. PC14 Ability to use methods of valuation of intellectual property rights for their further commercialization, including for the sale of licenses and technology transfer. PC16 Ability to formulate technical requirements for developed products and technologics, to determine technical conditions of operation and maintenance of new equipment, to allocate key technological parameters of developments and to define their target or normative values in the field of engineering. PC17 Ability to create universal most effective algorithms for modeling processes in electrical systems and conduct their research. PC18 Ability to optimize technological parameters of dovelopments and technologies and industries. PC18 Ability to reate universal most effective algorithms for modeling processes in electrical systems and conduct their research. PC19 Ability to optimize technological processes and build block diagrams of automated control systems. PC20 Ability to optimize technological processes and build block diagrams of automated control systems. PC20 Ability to optimize technological processes and build block diagrams of automated	 achievement of a specific goal, taking into account all aspects of the problem, including the production, operation, maintenance and disposal of equipment for power, electrical and electromechanical systems. 	7 – Program outcomes of studying	7 – 1	Program outcomes of studying

POS1 Know and understand the main types of intellectual property law and methods of its protection, methodological and legislative bases of creation of intellectual property objects.

POS2. Know and understand the main provisions of regulatory documents governing innovation in Ukraine.

POS3. Know the list of major open international banks of electronic resources to support educational, research and innovation activities.

POS4. Know the basic principles of sustainable development of society, taking into account the social, technological, economic and environmental aspects of human activity.

POS5. Know a foreign language at a level that provides free discussion with foreign scientists

on current scientific and technical problems of power engineering, electrical engineering and electromechanics and the opportunity to speak at foreign conferences and symposia.

POS6. Know and understand current standards, regulations and rules according to which Ukraine operates in the field of electricity, electrical engineering and electromechanics.

POS7. Know and understand the rules of safe operation of electrical, electrical and electromechanical equipment.

POS8. Know the main provisions of the Energy Strategy of Ukraine and the principles of energy security.

POS9. Know the main effective methods and approaches aimed at improving energy efficiency and reliability of electrical, electrical and electromechanical equipment and related complexes and systems.

POS10. Know the basic principles of the latest approaches and modern methods of research in the field of power engineering, electrical engineering and electromechanics.

POS11. To reproduce processes in electric power, electrotechnical and electromechanical systems at their computer modeling.

POS12. Master new versions or new software designed for computer modeling of objects and processes in electrical, electrical and electromechanical systems.

POS13. Reconstruct existing electrical networks, stations and substations, electrical and electromechanical complexes and systems in order to increase their reliability, operational efficiency and resource life.

POS14. Apply the technique of intelligent control in the study and design of relevant complexes and systems.

POS15. Apply methods of engineering activities in the field of modern electrical systems.

POS16. Synthesize systems for automatic control of various objects based on the theory of fuzzy logic and using the theory of artificial neural networks.

POS17. Create universal most effective algorithms for modeling the processes of electrical complexes and conduct their research on modern equipment with modern software.

POS18. Create intelligent-adaptive systems of automated control and monitoring of technical condition by electromechanical equipment based on the use of programmable logic controllers.

POS19. Knowledge of the composition and sequence of development of innovative projects.

POS20. Knowledge, understanding and practical application of experimental theory, methods of experiment planning, evaluation of experimental results, methods of analysis of experimental data and construction of mathematical models based on them, including the use of new methods based on the use of modern information technologies.

POS21. Perform physical and mathematical modeling, static and dynamic analysis of structures, mechanisms, materials and processes at the design stage using modern computer systems.

POS22. Choose the element base of electromechanical and mechatronic systems, complete electric and hydraulic drives, control, protection, automation of power supply systems of machines and installations, production sites and enterprises.

POS23. Create intelligent-adaptive systems of automated control and monitoring of technical condition by electromechanical equipment based on the use of programmable logic controllers and on-board computers.

POS24. Calculate forces, stress-strain state, velocities, moments, power, static and dynamic properties, electromechanical equipment, perform power and hydraulic calculations of hydraulic drive elements, electric drives, linear and nonlinear elements, electric and magnetic circuits.

POS25. Fluently communicate orally and in writing in state and foreign languages on modern scientific and technical problems of electric power, electrical engineering and electromechanics.

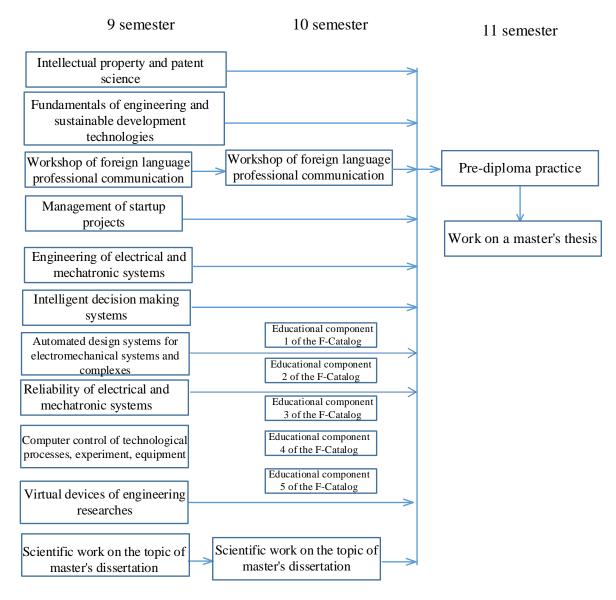

POS26. Identify problems and identify constraints related to environmental, sustainable development, health and safety and risk assessments in the fields of electricity, electrical engineering and electromechanics.

8 – Reso	urce provision of the program's implementation
Staffing	In accordance with the personnel requirements for ensuring the implementation of educational activities for the appropriate level, approved by the resolution of the Cabinet of Ministers of Ukraine dated December 30, 2015 N_{D} 1187 (as amended by the resolution of the Cabinet of Ministers of Ukraine dated May 10, 2018 N_{D} 347)
Information and methodological supplying	In accordance with the technological requirements for material and technical support of educational activities of the appropriate level of HE, approved by the resolution of the Cabinet of Ministers of Ukraine dated December 30, 2015 № 1187 (as amended by the resolution of the Cabinet of Ministers of Ukraine dated May 10, 2018 № 347)
Information and methodological supplying	In accordance with the technological requirements for educational and methodological and informational support of educational activities of the relevant level of HE, approved by the Cabinet of Ministers of Ukraine dated December 30, 2015 № 1187 (as amended by the Cabinet of Ministers of Ukraine dated May 10, 2018 № 347)
	9 – Academic mobility
National Credit Mobility	Possibility to conclude agreements on academic mobility, double graduation, etc.
International Credit Mobility	Possibility of concluding agreements on international academic mobility (Erasmus $+$ K1), on double graduation, on long-term international projects that involve the inclusion of students, etc.
Teaching of foreign applicants acquiring higher education	For foreign citizens, education is provided in English, and Ukrainian is studied as a foreign language

2. LIST OF COMPONENTS OF THE EDUCATIONAL PROGRAM

E/D code	Components of the educational program (disciplines, course projects (works), practices, qualification work)	Number of credits	Final assessment form
1	2	3	4
	NORMATIVE educational component	ts	
	General training cycle		
GT1	Intellectual property and patent science	3	credit
GT2	Fundamentals of engineering and technology of sustainable development	2	credit
GT3	Workshop of foreign language professional communication	3	credit
GT4	Management of startup projects	3	credit
	Vocational training cycle		
VT1	Engineering of electrical and mechatronic systems	5	exam
VT2	Intelligent decision making systems	4,5	credit
VT3	Automated design systems for electromechanical systems and complexes	4	exam
VT4	Reliability of electrical and mechatronic systems	4	exam
VT5	Computer control of technological processes, experiment, equipment	4,5	credit
VT6	Virtual devices of engineering researches	4	credit
	Research (scientific) component		
VT7	Scientific work on the topic of master's dissertation	4	credit
VT8	Pre-diploma practice	14	credit
VT9	Work on a master's thesis	12	defense
	SELECTIVE educational components	S	
	Vocational training cycle (Optional subjetcs from Facu	ilty catalogue)	
VO 1	Educational component 1 from F-Catalog	5	exam
VO 2	Educational component 2 from F-Catalog	4	credit
VO 3	Educational component 3 from F-Catalog	5	exam
VO 4	Educational component 4 from F-Catalog	4	credit
VO 5	Educational component 5 from F-Catalog	5	exam
	Total scope of normative educational components::		67
	Total scope of selective educational components:		23
ТОТ	AL SCOPE OF THE EDUCATIONAL PROGRAM		90

3. STRUCTURAL-AND-LOGICAL SCHEME OF THE EDUCATIONAL PROGRAM

4. THE FORM OF GRADUATION CERTIFICATION FOR THE RECIPIENTS OF HIGHER EDUCATION

Certification applicants a higher education professional program "Engineering of intelligent electrical and mechatronic systems" specialty 141 " of Electric Power Engineering, Electrotechnics and Electromechanics " takes the form of a public defense of the qualification work and completed delivery of documents form for awarding him the degree of Master of Electric Power Engineering, Electrotechnics and Electromechanics.

Qualification work is checked for plagiarism and after the defense is placed in the repository of scientific and technical library University for free access. Graduation certification is open and public.

5. MATRIX OF CORRESPONDENCE OF PROGRAM COMPETENCES TO EDUCATIONAL PROGRAM COMPONENTS
